## Welcome to the Paris International Liver Meeting 2026!

Dear Colleagues,

It is our great pleasure to welcome you on behalf of the Scientific Committee to the Paris International Liver Meeting, which will be held in the beautiful city of Paris from January 19-21, 2026.

This meeting will bring together leading experts, clinicians, researchers, biopharmaceutical industry and healthcare professionals from around the world to share the latest clinically relevant advances in the management and treatment of chronic liver diseases. Also, this meeting will bring together all important stakeholders to interact and share practical perspectives about important liver diseases.

Over three days, the program will explore and provide up-to-date short reviews by the best experts on the different aspects of clinical hepatology, including MASLD, MetALD, ALD, viral hepatitis, cholestatic liver diseases, HCC and complications of cirrhosis.

Over the course of the meeting, you will have the opportunity to interact with thought leaders, attend thought-provoking sessions, contribute to discussions and interact with leading biopharmaceutical leaders in liver disease that we hope will not only deepen your knowledge, but also be helpful in your clinical practice.

Join us at the prestigious Maison de la Chimie for a fruitful and productive meeting!
